Notifications & Background Services: Push Notifications (FCM), Local Notifications, Background Tasks

Version Control & CI/CD: Git, GitHub, CI/CD for Flutter Builds (APK / AAB / iOS)

Deployment & App Publishing: Google Play Store (AAB / APK), Apple App Store (TestFlight)

PROFESSIONAL EXPERIENCE

App Developer

Feb 2025 - Current

theproperty.com - Islamabad Pakistan

Built a Flutter-based app that connects users with various home service providers such as electricians, plumbers, technicians, and water delivery. The system includes two apps—one for customers to book services and another for service providers to manage and track requests. Features include real-time location tracking, push notifications, and a web dashboard for admin control.

Property Listing Feature:

Users can also upload properties for sale or rent, including houses, shops, flats, and plots—similar to platforms like Zameen.com

App Developer
GULLF GROUP SDN BHD – *Malaysia*

Nov 2024 - Jan 2025

Food Delivery Platform: Built a dual-app system in Flutter—one for customers to order food and track deliveries, and another for delivery partners to manage orders. Includes a responsive web interface for restaurant management, with real-time updates and location tracking

App Developer (Trainer)
BRAINS Institute Peshawar

Aug 2023 - Nov 2023

App Developer
IT Artificer Pvt. Ltd - *Peshawar Pakistan*

March 2022 - March 2024

Smart Waste Bin Monitoring System: Developed an IoT-based application that integrates with a Raspberry Pi to monitor waste bins. The system detects bin location and fill levels (e.g., 50%, 60%) in real-time, optimizing waste collection efficiency through automated updates and alerts.

M

Health Connect App: Designed a health application allowing patients to search for and connect with doctors. Implemented REST APIs for seamless doctor discovery, appointment scheduling, and real-time communication, enhancing accessibility to healthcare services.
